DIGI Only: Sympathy Dub

Düsseldorf's deepest producer **Matt Flores** strikes again with three kickin & moving tunes. For his fifth release on **Farside Records** you can expect the usual unique sounding music out of Matts' Metaworld Universe. Like his latest releases/remixes for **Tokyo Dawn** or **Vienna Scientists**, **Matt** once again proves his skills in producing warm house tunes with an electronic feel.

“**Water On The Moon**” is deep and kicking at the same time. With a killer bassline & beautiful synth stabs, this one builds up into a dubby & deep musical experience. Not just for late night sessions.

The **Session Victim** Remix of “**Water On The Moon**” puts the focus a little more on the funky & melancholic parts of the tune. The **Session Victim** boys Hauke & Matthias show their affinity for disco grooves while keeping things deep & dubby. These guys from Berlin/Hamburg are rightly one of the hottest acts around and more than established with releases on **Delusions Of Grandeur**, **Future Classic** & their own Label imprint **Retreat**. Just incredible & wonderful house music.

The slow deep-tech monster “**Continuum**” starts with a killer groove, wonderful strings and transfers more and more into an slightly evil sounding techy scorcher. This one turns heads for sure.

The Digi Only tune “**Sympathy Dub**” has a very organic feel and melts one or two samples for some ecstatic dancefloor pressure. Its extraordinary hit potential might convert “**Sympathy Dub**” into the secret winner on this EP.
